

GLOBAL

INDUSTRY-CENTRIC ENGINEERING SOLUTIONS

AT A GLANCE

About Us

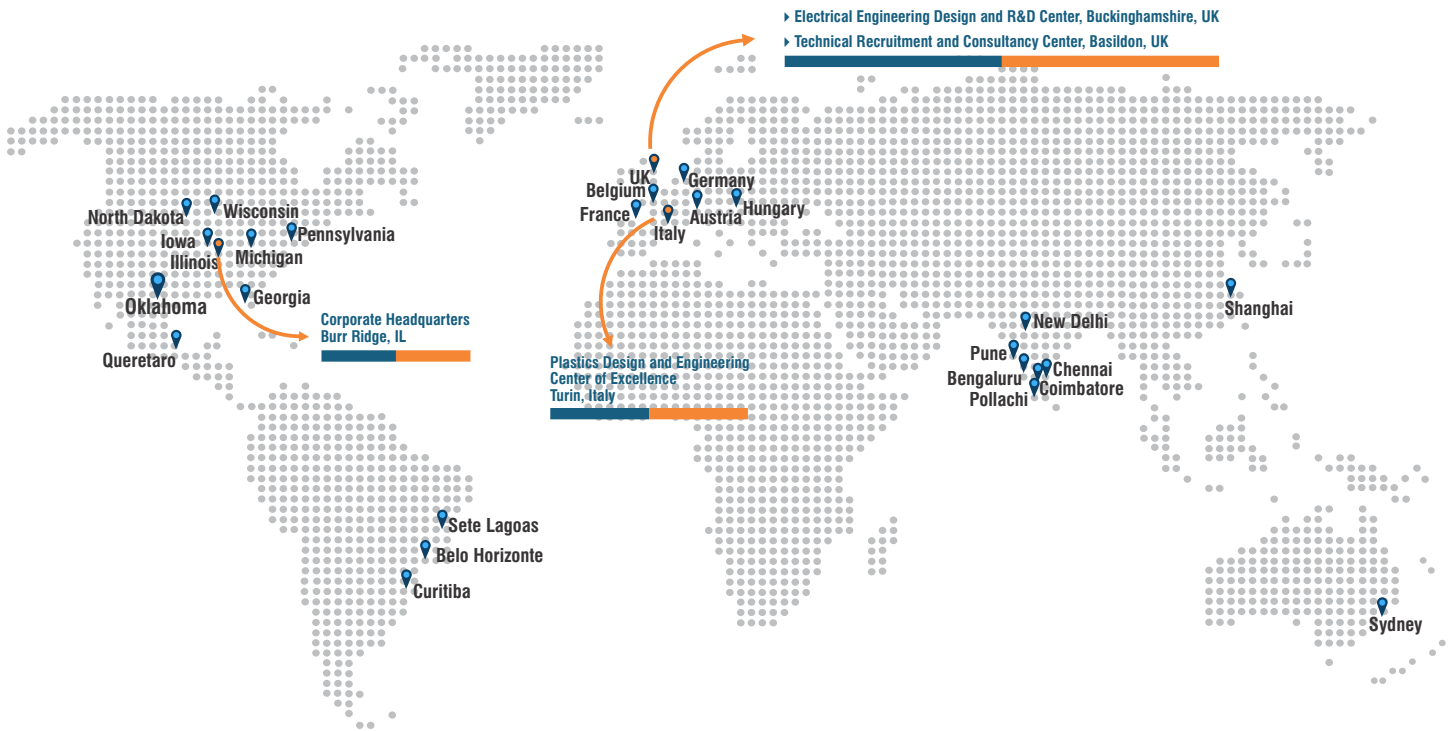

We are a global engineering solutions company with a focus on Automotive, Off-Highway and Heavy Equipments. Our service offerings span across Mechanical engineering, Electrical engineering, Embedded & Electronics engineering, Industrial and Manufacturing engineering, Aftermarket, Technical publications, Multimedia, Analytics/BPO and Software application development.

Our solutions cover the product life-cycle using a combination of domain competencies, experience from customer engagements and specific enablers such as Platforms, Tools and Standards.

Our engineers have extensive experience in delivering projects that are globally spread with varied program guidelines, standards and compliance needs. This gives us a unique advantage as we are able to design solutions that specifically address customer requirements which may vary by region and be influenced by local industry dynamics.

We are affiliated to the Sakthi Group, a \$2.0 Bn conglomerate having diversified presence across several industries. More specifically, we leverage the manufacturing expertise of Sakthi Auto Components, a preferred supplier to Global Auto OEMs in North America, Europe and Asia. The insight from this affiliation is deployed to address complex projects for our customers globally.

Our Global Presence

Depicts Caresoft delivery centers and project delivery locations

WHO ARE WE?

We are Industry-Centric

Our solutions are Industry-Centric addressing the entire product life cycle
Our solutions cover product design, production, quality and aftermarket

We have a strong foundation

We are backed by the Sakthi Group
The manufacturing lineage from Sakthi Automotive Group enables us to offer
bespoke solutions to our customers

We are global

We are truly global. We are relatively more global than several large
players in the industry
We operate from over 15 countries across 25 global locations

We are fast growing

We have recorded exponential growth since inception
This growth is faster than our competitors and exponential compared to larger
players

We are innovative

We have developed cutting edge products that have become disruptors
in the marketplace
We specialize in developing solutions that support the manufacturing value
chain

Service Offerings

MECHANICAL ENGINEERING

- Concept Engineering
- Design Support
- Validation and Optimization
- Sustenance Engineering
- PLM Solutions
- Product Realization

INDUSTRIAL AND MANUFACTURING ENGINEERING

- Industrial Engineering
- Manufacturing Design & Operations
- Advance Manufacturing Support
- Quality Engineering
- Material Planning & Logistics
- Process Engineering

AFTER MARKET & PARTS

- Design Kits Validation
- Change Management & Release Support
- Supplier Management
- Sales and After sales
- Cost Savings

ANALYTICS & BPO

- Data Estimation Services
- Data Entry
- Market Research
- MIS & Reporting services

ELECTRICAL AND ELECTRONICS ENGINEERING

- Concept Engineering
- Standardization and Optimization
- Design Development and Support
- Post Production
- Validation
- Production and Change Management

TECHNICAL RECRUITMENT AND CONSULTING

Permanent and Contract technical staffing for Engineering, Manufacturing and Management roles across the Globe

TECHNICAL PUBLICATIONS AND MULTIMEDIA SOLUTIONS

- 3-D Interactive Parts Catalog
- Product Rendering and Visualization
- Interactive Mobile Applications
- e-Learning and e-Publishing
- 2D and 3D Animations
- Animation and Visual Effects
- Web-based Solutions

SOFTWARE DEVELOPMENT

- Bespoke Product Development
- Business Analysis & Solution Design
- Software Testing
